**BOA Staff Report
December 14, 2020**

ACTION:

Missouri Made Marijuana (MMM) LLC is requesting a Conditional Use Permit to operate a Medical Marijuana Infused Products Manufacturing Facility on approximately 6 acres. The 6 acres is generally located at the east end of South Outer Belt Road on the south side of Interstate 70. This is the same site that the Board of Alderman approved a Conditional Use Permit (Ordinance 2503) for MMM to operate a Medical Marijuana Cultivation Facility.

Since the applicant is changing the previous approved use of a structure for cultivation to now cultivation and manufacturing, a separate conditional use permit is required for the manufacturing operation.

PURPOSE:

To allow the operation of a medical marijuana infused products manufacturing facility under Section 425.050 of the City's Code of Ordinances. A medical marijuana manufacturing facility is a facility licensed by the Missouri Department of Health and Senior Services to acquire, store, manufacture, transport, and sell marijuana infused products to a medical marijuana dispensary facility, a medical testing facility, or to another medical marijuana infused products manufacturing facility.

The manufacturing operation and cultivation of medical marijuana will take place in three fully enclosed buildings on the site. The buildings and site infrastructure will occur in two phases. Phase 1 will entail the construction of one building consisting of over 27,563 square feet and interior drives and parking areas. Phase 2 will entail the construction of two buildings of similar size.

The submitted site plan is very similar to the approved site plan for the cultivation facility with the exception that the circular drives between buildings 1 and 2 with building 3 is being replaced with a singular drive, the relocation of the trash enclosure and an alternative fence material around half of the property.

The 6 acres has been platted as Lot 1 of Black Industries Subdivision. BlackHooks Investments, LLC owns the property.

ANALYSIS:

The property is zoned District M-1 (Light Industrial). A medical marijuana infused products manufacturing facility may be located as a conditional use permit in District M-1 upon compliance with the provisions in Section 425.050.

The Missouri Department of Health and Senior Services has issued a license (#MAN000090) to manufacture medical marijuana at this location. The license was issued until the period ending on July 24, 2021.

The applicant complies with Section 425.060 (A.3.), distance requirement from another medical marijuana facility, because both facilities share common ownership.

The cultivation facility is significantly more than 750 feet from any existing elementary or secondary school, day care or church.

Site plans for each phase were submitted and a floor plan showing the various activities, including both the cultivation and manufacturing processes that will be conducted. In reviewing the site plans and other supplemental plans, staff offers the following comments:

- 1) The submitted site plans, C.2 and C2.1, proposes an alternative fence for the east and south property lines. In the CUP for the cultivation facility, there is a condition as follows, "The perimeter fence for the facility shall be no taller than 8 feet and shall be a wrought iron spike type fence or similar material". The applicant provided a detail sheet for a black welded steel spike fence that is known as Ameristar Montage. This would be an acceptable similar material as noted above. With the site plans for the manufacturing facility, the applicant is asking to modify the fencing condition to allow the Ameristar Montage along the north and west property lines and allow a black chain link fence using all black components to be installed along the east and south property lines. Staff has no objection to this request and has a condition in the staff recommendation that will allow this modification.
- 2) The submitted landscape plan shows the landscaping materials and pattern along both the north property line and west property line along the frontage on the new public street.
- 3) Since buildings 1 and 3 are within three hundred (300) feet of the right-of-way for I-70, the exterior walls visible from right-of-way must comply with Section 400.220 of the city's zoning regulations. The applicant proposes the same exterior materials, brick wainscot with E.I.F.S panels, that was approved with the cultivation CUP.

The applicant must provide a plan which reasonably shows that the manufacturing facility is capable, when functioning properly, of preventing odors of marijuana from being detected by a person beyond the boundary of the lot on which the medical marijuana cultivation facility is located.

The previous approved odor control plan will remain unchanged. The applicant's plan is to utilize a custom air cleaning system to mitigate potential odors. The custom air quality engineering and ventilation system is environmentally friendly, energy efficient, cleans air and prevents odors from escaping.

The applicant must provide a security plan for review and approval by the Police Department, which reasonably shows that the cultivation facility can be kept secure from access by unauthorized persons both during after normal operating hours.

The applicant's security plan was reviewed and approved by Chief Beale and his executive staff.

*Community Development
Mark Trosen, Director*

The previous approved waste disposal plan will remain unchanged. All the facilities' activities associated with waste storage, disposal and recycling shall be tracked by MMM's Inventory Control System and in accordance with proper state regulations.

The applicant has indicated that signage will be minimal for this facility and confirms that all signage will conform to the city's code of ordinances as well as the State guidelines.

Regarding surrounding land uses, the area to the north is Interstate 70. To the west, the property is zoned District M-1 and contains the Mo Country bar. To the south, the Penny's Concrete batch plant and is zoned District M-1. To the east, the property is vacant and is zoned District M-1.

PUBLIC INFORMATION AND PROCESS:

Public notice was given in the Examiner and by letter to property owners of record within 185 feet of the applicant's property.

STAFF RECOMMENDATION:

Staff recommends approval of a Conditional Use Permit to operate a Medical Marijuana Infused Products Manufacturing Facility, in addition to the approved CUP for the Cultivation Facility, on the described site subject to the following conditions:

- 1) The Conditional Use Permit is issued only to Missouri Made Marijuana LLC at the approved site and shall not run with the land.
- 2) If Missouri Made Marijuana LLC's State-issued license is not renewed or is revoked for any reason, then the Conditional Use Permit shall terminate immediately without any additional notice.
- 3) Missouri Made Marijuana LLC shall provide a copy of the Manufacturing State license, issued by the Missouri Department of Health and Senior Services, to the Planning and Zoning Commission annually to confirm their continuing licensed status with the State of Missouri.
- 4) The perimeter fence along the north and west property lines shall be an 8 foot tall "Ameristar Montage" black spike steel panel or reasonably equivalent as approved by the Community Development Director and the perimeter fence along the east and south property lines shall be an 8 foot tall "Ameristar PermaCoat" black chain link fence using all black components for posts, clips, rails and attachments or reasonably equivalent as approved by the Community Development Director.

PLANNING AND ZONING COMMISSION:

The Planning and Zoning Commission unanimously recommended approval subject to the four condition above at their November 18, 2020.

I. Narrative Description of the Proposed Use

Missouri Made Marijuana, LLC, ("MMM") proposes to develop a Medical Marijuana-Infused Products Manufacturing Facility ("Project"), in Grain Valley, Missouri. A Medical Marijuana-Infused Products Facility is defined in the Code of Ordinances, City of Grain Valley, Missouri ("City Code") as "a facility licensed by the department to acquire, store, manufacture, transport, and sell marijuana-infused products to a medical marijuana dispensary facility, a medical marijuana testing facility, or to another medical marijuana-infused products manufacturing facility."

The Project will be located on property currently zoned M-1 Light Industrial District. MMM is seeking a Conditional Use Permit ("CUP") from the City with the submission of this application pursuant to Sections 400.240 and 425.060 of the City Code. The Project will be designed to meet all applicable Land Use requirements pursuant to Title IV of the City Code.

On May 27, 2020, the City approved Ordinance Number 2503 which granted MMM a CUP for a Medical Marijuana Cultivation Facility located at the east end of South Outer Belt Road on the south side of Interstate 70 and north of Penny's Concrete facility (the "Project Site"). Further, the City Code allows multiple medical marijuana facilities to be located on the same parcel if the facilities share common ownership. Here, MMM's CUP application proposes to develop the Project on the same parcel (i.e., the Project Site) as the previously approved Medical Marijuana Cultivation Facility. MMM's previously approved CUP application included the following supporting documents:

- Site Plan and Legal Description
- Map Depicting General Location of Site
- Landscaping Plan
- Building Elevations
- Floor Plan
- List of Property Owners within 185 feet
- Proof of Permission from the Property Owner
- Odor Control Plan
- Security Plan, and a
- Waste Disposal Plan

Note, MMM's CUP application for the Project includes the following supporting documents: Site Plan, Legal Description, revised Floor Plans, and Security Plan. Note, MMM has received a Medical Marijuana-Infused Products Facility License (the "License") from the State of Missouri. A copy of the License will be submitted to the City as a supplement to this application. No changes were made to all other previously approved supporting documents that are referenced above. Therefore, such documents are not included as part of this CUP application.

The following pages set forth the criteria for Supplemental Regulations for Medical Marijuana-Infused Products Manufacturing Facilities.

4. ***A security plan for review and approval by the Grain Valley Police Department, which reasonably shows that the medical marijuana-infused products manufacturing facility can be kept secure from access by unauthorized persons both during and after normal operating hours and provides adequate overnight security for product trucks parked outside the medical marijuana-infused products manufacturing facility at any hour.***

The Project will bear discreet signage and be protected by cement ballasts. It will be fully enclosed and equipped with locks and security devices that limit access to only authorized persons at authorized times. MMM's sophisticated, tamper resistant, 24/7 surveillance system monitors the facility interior and exterior at every point of ingress and egress and in every area containing marijuana, in any amount.

The Project's security system is enhanced with a network of 4-way video monitoring, door contacts, and motion sensors to detect intrusion. Windows are minimal, alarmed, and locked. Interior doors automatically lock and are equipped with intrusion sensors. Unauthorized access is prevented with biometric scanners and card readers programmed to record entries and limit entrance to authorized persons at appropriate times. Concealed panic buttons are situated in the vault, storage, security stations and all sensitive areas. The Project's electronic security systems enable data and film retrieval and are backed up by storage and power source redundancies.

Extensive law enforcement and military service enables the Security Director (SD) to implement and oversee the Project's Security Plan in

resplendent detail. SD trains all employees in MMM's established facility, product and personal security and emergency protocols. Security surveillance and equipment access is limited to SD, law enforcement, the Department and those security personnel receiving enhanced surveillance and equipment training and are essential to surveillance operations. 19 CSR 30-95.040(4)(H)

Facility employees and visitors enter through a single secure entrance, sign in and out. Visitors will wear visitor badges and be escorted at all times. 19 CSR 30-95.040(4)(H)1.F.

SD and security personnel store security records for 5 years and will vigilantly monitor and randomly patrol facility interior and exterior areas to ensure: Employees are properly badged and in assigned positions; Identify and remedy safety or security concerns; Inventory is properly secured; Locks and security equipment are properly maintained and unobstructed; Premises are well-lit and properly operating; Prevent loitering, equipment and door tampering; Visitors are logged, bagged and escorted; and Identify, remedy and report suspicious activity.

The Project also ensures marijuana is securely cultivated, stored, tested, packaged and transported through frequent and randomized inventory audits and its METRC and BioTrack Inventory Control System (ICS). Employee's receive unique ICS logins to track their activities and marijuana's movement in the facility. The ICS ensures seed-to-sale reporting and prevents marijuana diversion and loss. (19 CSR 30-95.100 and 19 CSR 30-95.040)

See attached security drawings.

5. ***A waste disposal plan for any unused product, medical marijuana byproduct, or hazardous materials used as part of normal operations by a medical marijuana-infused products manufacturing facility in accordance with Missouri Department of Health and Senior Services guidelines.***

The Project will utilize the previously approved waste disposal plan that will remain unchanged. Such plan is summarized below.

All of the Project's activities associated with facility waste storage, disposal and recycling shall be tracked by MMM's Inventory Control System ("ICS") and in accordance with proper practices and 19 CSR 30-95.040(4)(E).

The Project shall securely store marijuana and marijuana waste in locked areas. The disposal of marijuana shall commence at the facility in the designated destruction area, be witnessed by a person other than the destroying employee, recorded by video camera and recorded in The Project's ICS.

Cannabis waste disposal information shall be kept in the Project's ICS which shall include, without limitation, the following information:

Date, time, method of disposal;
Disposal employee and witness;
Description of and disposal reason;
ICS tracking number;
Weight (using commercial calibrated scale);
Confirmation product was rendered unusable; and
Final disposal destination.

MMM will maintain ICS and all related disposal records for at least 5 years.

The Project will evaluate all solid and liquid waste to determine if its hazardous waste pursuant to 40 CFR 261.2. Non-hazardous marijuana waste generated by the manufacture processes, such containers, plant stalks and biomass, will be separated into recyclable/compostable classes.

Waste generated by business operations, such as used office supplies, garden tools and trash, will be recycled or disposed of in a properly waste facility.

Compostable waste and plant biomass will be mixed with food or yard waste and reused by MMM as soil amendment, as applicable. Compost or compostable cannabis waste not used at the facility will be rendered unusable and unrecognizable by grinding the plant waste with other non-hazardous materials and discarded at a properly licensed waste facility.

Any hazardous waste will be managed and disposed of subject to the applicable hazardous waste management standards.

6. ***All signage shall conform to the standards of Section 400.300 and Section 800.030(E) of the Code of Ordinances as well as the Missouri Department of Health and Senior Services guidelines. Signage shall be reviewed and approved under a separate permit process.***

The Project will fully comply with this requirement.

- F. ***If an application for a medical marijuana-infused products manufacturing facility conditional use permit is approved, such conditional use permit shall be personal to the applicant at the approved site and shall not run with the land. In addition, the conditional use permit shall be subject to the applicant's continued compliance with all applicable city ordinances and state law regarding the operation of a medical marijuana-infused products manufacturing facility. A medical***

marijuana-infused products manufacturing facility conditional use permit shall be personal to the applicant and shall not be transferable. In the event the applicant's state-issued license expires, terminates, or is revoked for any reason, their conditional use permit shall terminate immediately without any additional notice or action.

The Project will fully comply with this requirement.

- G. **If any change occurs from the permitted use of a structure as a medical marijuana-infused products manufacturing facility, a new conditional use permit shall be required in all cases.**

The Project will fully comply with this requirement.

- H. **The state licensed operator of any medical marijuana-infused products manufacturing facility shall provide a copy of their state license, issued by the Missouri Department of Health and Senior Services, to the Planning & Zoning Commission annually to confirm their continuing licensed status with the State of Missouri. In the case of a medical marijuana-infused products manufacturing facility that was granted a conditional use permit by the City, the state licensed operator and the applicant to whom the conditional use permit was issued shall be the same. The City may request such documentation at any time.**

The Project will fully comply with this requirement.

UTILITY NOTES:

- The contractor is specifically cautioned that the location and/or elevation of existing utilities as shown on these plans is based on records of the various utility companies, and where possible, measurements taken in the field. The information is not to be relied on as being exact or complete. The contractor must call the appropriate utility companies at least 48 hours before any excavation to request exact field location of utilities. It shall be the responsibility of the contractor to coordinate with and relocate &/or remove all existing utilities which conflict with the proposed improvements shown on the plans.
- The construction of storm sewers on this project shall conform to the requirements of the City of Grain Valley's Technical Specifications and Design Criteria.
- The contractor shall field verify the exact location and elevation of the existing storm sewer lines and the existing elevation at locations where the proposed storm sewer collects or releases to existing ground. If discrepancies are encountered from the information shown on the plans, the contractor shall contact the design engineer. No pipes shall be laid until direction is received from the design engineer.
- It will be the contractor's responsibility to field adjust the top of all manholes and boxes as necessary to match the grade of the adjacent area. Tops of existing manholes shall be raised as necessary to be flush with proposed pavement elevations, and to be 6-inches above finished ground elevations in non-paved areas. No separate or additional compensation will be made to the contractor for making final adjustments to the manholes and boxes.
- Inlet locations, horizontal pipe information and vertical pipe information is shown to the center of the structure. Deflection angles shown for storm sewer pipes are measured from the center of curb inlets and manholes. The contractor shall adjust the horizontal location of the pipes to, on to the face of the boxes. All roof drains shall be connected to storm sewer structures. Provide cleanouts on roof drain lines at 100' max. Spacing and at all bend points. Do not connect roof drains directly to storm sewer pipe.
- The contractor shall be responsible for furnishing and installing all fire and domestic water lines, meters, backflow devices, pits, valves and all other incidentals required for a complete operable fire protection and domestic water system. All costs associated with the complete water system for the buildings shall be the responsibility of the contractor. All work shall conform to the requirements of the City of Grain Valley.
- The contractor shall be responsible for furnishing and installing all sanitary sewer service lines from the buildings to the public line. All work shall conform to the requirements of the City of Grain Valley.
- The contractor will be responsible for securing all permits, bonds and insurance required by the contract documents, the City of Grain Valley, and all other governing agencies (including local, county, state and federal authorities) having jurisdiction over the work proposed by these construction documents. The cost for all permits bonds and insurance shall be the contractor's responsibility and shall be included in the bid for the work.
- By the use of these construction documents the contractor hereby agrees that he/she shall be solely responsible for the safety of the construction workers and the public. The contractor agrees to hold the engineer and owner harmless for any and all injuries, claims, losses or damages related to the project.
- The Contractor shall be responsible for furnishing all materials, tools and equipment and installation of electrical power, telephone and gas service from a point of connection from the public utility lines to the building structures. This will include all conduits, service lines, meters, concrete pads and all other incidentals required for a complete and operational system as required by the owner and the public utilities. Refer to building plans for exact tie-in locations of all utilities. Contractor shall verify connection points prior to installation of utility line.
- All fill material to be in place, compacted, and consolidated before installation of proposed utilities. On-site geotechnical engineer shall provide written confirmation that this requirement has been met and that utilities may proceed in the fill areas. All utilities are to be placed in trench conditions.
- Contractor shall notify the utility authorities inspectors 48 hours before connecting to any existing line.
- Water lines shall be as follows (unless otherwise shown on plans):
 - Pipe sizes less than 3-inches that are installed below grade and outside building shall comply with the following:
 1. Seamless Copper Tubing: Type "M" soft copper, ASTM B88.
 2. Fittings: Wrought copper (95.5 Tin Antimony solder joint), ASME B 16.22.
 - Minimum trench width shall be 2 feet.
- Contractor shall maintain a minimum of 42" cover on all waterlines. All water line joints are to be mechanical joints with thrust blocking as called out in specifications and construction plans. Water mains and service lines shall be constructed in accordance to the City of Grain Valley's specifications for commercial services.
- All waterlines shall be kept min. ten (10') apart (parallel) from sanitary sewer lines or manholes. Or when crossing, on 24" vertical clearance (outside edge of pipe to outside edge of pipe) of the water line above the sewer line is required.
- Sanitary conflicts will be resolved prior to permit issuance.
- All underground storm, sanitary, water and other utility lines shall be installed, inspected and approved before backfilling. Failure to have inspection approval prior to backfill will constitute rejection of work.
- All necessary inspections and/or certifications required by codes and/or utility service companies shall be performed prior to announced building possession and the final connection of service. Contractor shall coordinate with all utility companies for installation requirements and specifications.
- Refer to building plans for site lighting electrical plan, irrigation, parking lot security system and associated conduit requirements. Coordinate with Owner that all required conduits are in place & tested prior to paving.
- When a building utility connection from site utilities leading up to the building cannot be made immediately, temporarily mark all such site utility terminations.
- Refer to the building plans for site lighting electrical requirements, including conduits, pole bases, pull boxes, etc.

BOA Staff Report
Final Plat – Eagle Ridge Estates – 4th Plat
December 14, 2020

PURPOSE:

The purpose of this request is to gain final plat approval.

BACKGROUND:

This property is located on the west side of where Eagle Ridge Blvd. ends and east of Tyer Road (north of the Water Tank and Tower). The proposed subdivision will contain 12 lots and a tract for stormwater detention purposes. The property is zoned District R-1 (Single Family Residential).

The Planning and Zoning Commission approved the preliminary plat on September 9, 2020.

ANALYSIS:

The final plat has slightly changed from the preliminary plat. Tract A was added to manage the stormwater drainage from the street, driveways, and rooftops. This required minor revisions to the lot widths on the north side of the cul-de-sac street.

In District R-1, the minimum lot width at the building line can not be less than 65 feet, except that 10% of the lots in each subdivision may be 60-foot lot widths. With 12 lots, only one lot can be 60 feet which is lot 2 on this final plat.

The final plat is in conformance with City Standards and engineering civil plans have been approved by City Engineer.

PLANNING AND ZONING COMMISSION:

The Commission, at their November 18, 2020, recommended approval of the final plat.

STAFF RECOMMENDATION:

Staff recommends approval of the final plat for Eagle Ridge Estates – 4th Plat.

BOA Staff Report
December 14, 2020
Amendment to Comprehensive Plan Future Land Use Map

PURPOSE:

The purpose of this request is to amend the future land use map titled “Preferred Land Use Plan” that is in the City’s Comprehensive Plan. The Comprehensive Plan was last updated in August 2014. Section 400.335 (Amendments to Comprehensive Plan Future Land Use Map) in Chapter 400 (Zoning Regulations) of the City’s Municipal Code outlines the process and criteria for review by the Planning and Zoning Commission.

BACKGROUND:

The City’s Comprehensive Plan contains a “Preferred Land Use Plan”. The land use plan presents a vision of how the community will grow in the future and where future land uses will be located. This plan illustrates land use types such as single family, multi-family, and business park.

The Preferred Land Use Plan illustrates the approximate 60 acres referenced in the application as Business Park. This land use designation would comprise primarily with the zoning classifications associated with Industrial or Research and Development.

The City’s Zoning Regulations includes a section that addresses the process and review criteria to amend the Comprehensive Plan Future Land Use Map.

After an application is filed with the required supporting documentation, the Planning and Zoning Commission must hold a public hearing to consider the proposed change. In determining whether the proposed amendment shall be approved, the Commission shall consider the following factors:

- 1) Whether events after the Comprehensive Plan adoption have change the character and/or condition of the area to make the application acceptable; and
- 2) Whether the change is consistent with the goals and policies of the plan; and
- 3) Whether the public services and utilities are adequate to serve the proposed land use in the map amendment; and
- 4) The impacts of the potential costs and benefits derived by the community or area by the proposed change.

After the public hearing, the Commission shall approve or deny the application. The Commission’s decision is forwarded to the Board of Aldermen as a recommendation for their review.

ANAYLSIS:

The proposed future land use map amendment illustrates the northern part of the tract, adjacent to Woodbury Estates, to be Single Family Residential. This area will be approximately 17 acres and contain 73 lots.

**Page 2, Staff Report
Comprehensive Plan Future Land Use Map Amendment**

The proposed land use map illustrates the middle section of the property to be Multi-family (Duplex) residential. This area will be approximately 8.5 acres and contain 32 duplex lots.

The southern section of the tract, adjacent to Jefferson Street, will remain Business Park. This area will be approximately 35 acres and contain 19 lots for industrial use.

Regarding the four factors above, Staff finds the following:

- 1) Since the adoption of the Comprehensive Plan, single family and duplex development has occurred from west to east, in accordance with the Preferred Land Use Plan. This pattern of land use should continue through this tract as proposed in the map amendment. The proposed land uses in the map amendment would be more compatible to the adjacent development that has occurred within the last years.
- 2) The proposed land use map amendment is consistent with public policy for the locations of the proposed land uses.
- 3) The public services and utilities are available on-site and are adequate to serve the proposed land uses in the map amendment.

PUBLIC INFORMATION AND PROCESS:

Public Notice was given in the Examiner and by letter to property owners of record with the County within 185 feet of the proposed future land use map amendment.

STAFF RECOMMENDATION:

Staff recommends approval to amend the Preferred Land Use Map in the City's Comprehensive Plan.

PLANNING AND ZONING COMMISSION:

At the November 18, 2020 meeting, the Planning and Zoning Commission vote 5 in favor, 0 against and one abstention to recommend approval.
